

Regional Development Programme Albania

Call for Proposals for the Grant Scheme on Regional Development and Cohesion

Annex A1 – Logical framework and Activity matrix

The Logical framework (log frame) is a matrix form to be filled with all the information already present in the narrative part of the Application form, adding indicators where possible. It will be the basis for the future reporting and monitoring of the project. The term "results" includes: Overall Objective (impact), Specific Objective (outcome), other outcomes and Outputs.

	Results chain	Indicator	Assumptions
Impact (Overall objective)	<i>The broader, overall context the project will accomplish, the impact the project will have at local and regional level (if applicable).</i>	<i>Quantitative and/or qualitative variable that provides a simple and reliable mean to measure the achievement of the corresponding result To be presented, when relevant, disaggregated by sex, age, urban/rural, disability, etc.</i>	<i>Not applicable</i>
Outcome (s) (Specific objective(s))	<i>Specific objectives are concrete statements describing what the project is trying to achieve. The specific objective (s) should be written in clear way so it can be evaluated at the conclusion of the project to see whether it was achieved or not. (It is good practice to have one specific objective only, however, other short term outcomes can be included here)</i>	<i>(see definition above)</i>	<i>Factors outside project management's control that may influence on the impact-outcome(s).</i>
Outputs	<i>The direct/tangible products (infrastructure, goods and services) delivered/generated by the intervention (*Outputs should in principle be linked to corresponding outcomes through clear numbering)</i>	<i>(same as above)</i>	<i>Factors outside project management's control that may influence on the other outcome(s)/output linkage.</i>

Activity Matrix to be in line with the activity plan in section 2.2.3 of the Application form

<p>What are the activities to be carried out to produce the intended outputs?</p> <p>(*activities should in principle be linked to corresponding output(s) through clear numbering)</p>	<p>Means What are the technical, financial, human and material resources required to implement these activities, e. g. staff, equipment, supplies, operational facilities, etc.</p> <p>Costs What are the action costs? (Breakdown in the Budget for the Action)</p>	<p>Assumptions Factors outside project management's control that may impact on the activities-outputs linkage.</p>
